Professional Summary

Detail-oriented and creative BS Information Technology student with hands-on experience in full stack web development, mobile app development, database-driven systems, and multimedia content creation. Skilled in building responsive web interfaces, Flutter-based mobile applications, and secure data workflows using modern backend services. Passionate about leveraging technology for practical community solutions through data-driven applications, user-centered design, and privacy-aware platforms.

Technical Skills

- **Frontend:** HTML5, CSS3, JavaScript (ES6+), Responsive Design
 - **Backend:** Node.js, Express.js, Python, RESTful APIs (*adjust if needed based on what you really use*)
 - **Databases & Backend Services:** MongoDB; SQL (MySQL/PostgreSQL); Supabase (PostgreSQL-based backend-as-a-service with auth, storage, and APIs)mindstudio+1
 - **Mobile Development:** Dart, Flutter for cross-platform mobile app developmentflutter
 - **Data:** Data mining, data cleaning, basic data analysis and interpretation
 - **Multimedia:** Graphic design, videography, video editing (for social media content, promos, and product showcases)
 - **Tools & Version Control:** Git, GitHub, VS Code, Command Line (Bash/CMD), Postman
 - **Concepts:** CRUD operations, API integration, authentication and user privacy, basic networking, database normalization
-

Projects

JOBOL's Food Ordering Management System

Role: Full Stack Developer

Tech: HTML, CSS, JavaScript, Node.js/Express, MongoDB/SQL (*adjust to your real stack*)

- Developed a web-based food ordering and management system to streamline order processing for local food businesses.

- Implemented features for menu browsing, cart management, and order tracking to improve customer experience and operational efficiency.
 - Designed database schemas for products, users, and orders to support reliable and scalable data storage.
-

Local Shops Promotion Website (Coffee Shops and Small Businesses)

Role: Frontend & Backend Developer

Tech: HTML5, CSS3, JavaScript, SQL/MongoDB

- Built a promotional website to showcase local coffee shops and small businesses with product details, locations, and contact information.
 - Developed mobile-responsive pages to ensure a smooth browsing experience on phones, tablets, and desktops.
 - Integrated basic content management so owners can update shop information, images, and promotional content without editing code.
-

TinkerNest – Privacy-Focused Social Interaction Platform

Role: Full Stack Developer / Product Designer

Tech: *(Specify your actual stack, e.g., React, Node.js/Express, MongoDB/SQL)*

- Designed and developed an online platform where users can communicate, interact, and share content while prioritizing data privacy and secure interactions.
 - Implemented core features such as user registration, login, profile management, and basic community interactions (e.g., posts, comments, or messaging).
 - Applied privacy-focused design principles by limiting data collection and using permission-based access to user information.
-

AgrySync – Agri-focused Online Shopping Mobile Application

Role: Mobile App Developer & System Designer

Tech: Dart, Flutter, Supabase (managed PostgreSQL database with authentication and APIs)supabase+2

- Developed a mobile application concept and prototype that connects restaurant and carinderia owners, riders, and farmers for purchasing rice, spices, vegetables, and fruits online.
- Implemented multi-role user flows (farmer, rider, and buyer) including product listing, order placement, and delivery coordination, using Flutter for the UI and Supabase to handle backend data and user authentication.supabase+1

- Utilized Supabase's database and security features to store user accounts, inventory, and order records, helping to improve transparency and efficiency in the agricultural supply chain.supabase+2

Education

Bachelor of Science in Information Technology

(Put your actual school name here)

Davao Region, Philippines

June 2023 – June 2027

Certifications

- **CCNA: Switching, Routing, and Wireless Essentials (Cisco NetAcad)** – Training in switching technologies, routing concepts, wireless LANs, and basic network security for small-to-medium networks.netacad+3
- **Computer Systems Servicing (CSS) NC II – TESDA** – Certification covering computer hardware assembly, OS and software installation, basic network setup, and troubleshooting of computer systems.tesda+1

Additional Experience

- Designed graphics and edited promotional videos for school projects and online content, optimizing formats for social media platforms.
- Worked on academic projects involving data mining and analysis, such as basic classification and trend analysis using Python and SQL.
